Hiring Manager
Hiring Team

Dear Hiring Manager,

I am excited to apply for the data analyst position. My background combines hands-on project experience with React, Next.js, and TypeScript. I would bring that same blend of curiosity and ownership to your team.

The clearest evidence comes from my recent work. Worked with the engineering team on a React + TypeScript admin dashboard. Design and deliver the GraphQL-backed service layer the product needed. Modeled the data, built the GraphQL endpoints, and hardened them with tests and proper error handling. Shipped on schedule and cut rework measurably in the following release. Each of these taught me to pair curiosity with measurable outcomes.

Beyond technical fit, I understand the role also calls for GraphQL, Redis, clear communication, and ownership. I close gaps quickly by learning in public, shipping in small reviewable increments, and asking sharp questions early. Every project I have taken on has reinforced that habit, and it is the working style I would bring to your team from day one.

I would welcome the chance to discuss how my experience can contribute to your team's goals. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Priya Sharma
